LIFTING MEANS

1. Kuka okretna PowerPoint-Star PP-S Swivelling hook PowerPoint-Star PP-S

Usuglašen sa strojarskim direktivama 98/37/EC.
Complies with the machinery directives 98/37/EC.

Dvostruki kuglični ležaj za slobodno okretanje i lako pritezanje navoja.
Prikladan za sve načine dizanja/vučenja npr. za kuke, prstene i priveznice.
Deblji tip kuke sprečava zloupotrebu i otporan je na savijanje.
Nije prikladna za stalno okretanje pod opterećenjem.
Moguće ju je okretati za 90° oko osi vijka iako je pod punim opterećenjem.

Povećana nosivost pri vertikalnom opterećenju
Increased WLL at vertical load direction (straight lift)

Double ballbearing for free turning and soft winding.
Suitable for all lifting/lashing means for example hooks, rings and slings.
Thickened type of the hook prevents handling malpractices and resists bending.
Not suitable for permanent swiveling under load.
Even under full load, can be turned in a 90° position from the bolt center line.

2. Prsten PP-B za spajanje kuka

PP-B - the ring connection for hook assembling

Četverostruko ispitana sigurnost!

Cr, Ni, Mo - čelik posebno toplinski obrađen i ugašen.

Brza amortizacija zbog lakog rukovanja.

Moguće ga je okretati za 90° oko osi vijka iako je pod punim opterećenjem..

Nije prikladna za stalno okretanje pod opterećenjem.

4 times proofed safety!

Cr, Ni, Mo-steel special quenched and tempered.

Fast amortization because of easy handling.

Can be turned under full load even a 90° position from the bolt center line.

Not suitable for permanent swivelling under full load.

Povećana nosivost pri vertikalnom opterećenju!
Increased WLL at vertical load direction (straight lift)

3. Prsten PP-VIP za direktno spajanje VIP lanca

PP-VIP - for direct chain connection of the VIP chain

Četverostruko ispitana sigurnost!

Cr, Ni, Mo - čelik posebno toplinski obrađen i ugašen.

Brza amortizacija zbog lakog rukovanja.

Moguće ga je okretati za 90° oko osi vijka iako je pod punim opterećenjem..

4 times proofed safety!

Cr, Ni, Mo-steel special quenched and tempered.

Fast amortization because of easy handling.

Can be turned under full load even a 90° position from the bolt center line.

Not suitable for permanent swivelling under full load.

Molim Vas navedite tip, veličinu navoja i F-vario!
Please indicate type, thread size and F-vario!

5. Prsten nosivi s vijkom - WBG-V

Load Ring bolted WBG-V

Opteretljiv u svim smjerovima.

Okretan ako je opterećen vertikalno.

Nije prikladan za stalno okretanje pod punim opterećenjem, posebno u smjeru 90°.

Jednostavna montaža, potreban je samo otvor s navojem.

Na raspolaganju su različite dužine (Vario).

Može biti upotrebljen i na prolaznim otvorima

Tip Type	Nosivost Working Load Limit	A	B	C	D	E	F	F Stand- ard	G max.	M	SW	X	Težina Weight	Navoj Torque	Ref. br. Ref.-No. (Standard)	Ref. br.* Ref.-No.* (Vario)

Loadable in any direction.

Turnable under load in vertical direction.

Not suitable permanent swivelling under full load, especially in 90° direction.

Simple installation, just a thread hole is required.

Variable lengths (Vario) available.

Can also be used for through holes.

360° okretanje / 180° gibljiv
Povećana nosivost pri vertikalnom opterećenju
360° swivelling / 180° pivoting
Increased WLL at vertical load direction (straight lift)

6. Vijak spojni nosivi - WBG

Load Ring bolted WBG

Nominal WLL -worst case
Ring not adjusted
to pull direction

Nominalno dopušteno opterećenje -najgora mogućnost ako prsten nije podešen u smjeru opterećenja

***Pažnja:** Tijekom podizanja, prsten točke podizanja može biti prikopčan u bilo kojem smjeru. Utisnuta nosivost WLL je za najgori mogući slučaj (vidi sliku X). Ako je prsten ručno podešen u horizontalni položaj, možemo izabrati višu nosivost WLL, upisanu u zagradama (), (vidi sliku Y). U slučaju pravocrtnog podizanja (vidi sliku Z: okomiti smjer opterećenja) nosivost WLL je maksimalna.

Za teška opterećenja koja treba okretati oko osi i vrtiti .

***Caution:** During lifting, the ring of the lifting point can engage in any position. The embossed WLL is for the worst case scenario (see image X). If the ring is manually adjusted to the horizontal position, higher WLL values in brackets () can be chosen (see image Y). In case of straight pull (see image Z: vertical load direction) Maximum WLL.

For heavy loads which have to be turned and swivelled.
